

## BSMEE - Approved Technical Elective List

*2017-18 Catalog Requirements*

Mechanical Majors are required to take 15 units of coursework from this list of approved technical electives. This total must include 9 units of 400-level AME-prefix coursework (courses in bold below).

**Students admitted under the 2017-18 catalog are required to complete at least one course (within the 15 total) that is designated math intensive (MI) in the list below.**

- A maximum of 3 units of internship credit (AME 493), 3 units of independent study (AME 499) and 3 units of directed research (AME 492) can count toward the technical elective requirement.
- Students may propose a 300/400 level sci or engr class to be considered for pre-approval as a tech elective.
- Some students may also be eligible to take graduate level coursework to apply as technical electives.
- Students are responsible for all prerequisites (check catalog).
- Math: Any 300/400 level class applying to math minor may count as a non-AME tech elective.
